

Coopers Maverick®

Coopers Maverick is a water-based, off-shears pour-on for the control of sheep body lice (*Bovicola ovis*), including lice resistant to synthetic pyrethroids and for the treatment and control of abamectin sensitive strains of gastrointestinal nematodes of sheep (including levamisole resistant strains).

ACTIVE INGREDIENT

6.0 g/L abamectin (Macrocyclic Lactone (ML)).

COOPERS® MAVERICK®

LICE AND WORM CONTROL IN ONE DRUM

How to Use Maverick®

Coopers MAVERICK is intended for off-shears use (within 24 hours of shearing) on all classes of sheep over 6 weeks of age and greater than 10 kg liveweight.

Coopers MAVERICK is applied along the topline in two adjacent bands, either side of the backline, from the poll (bands may overlap along the neck) to the tail of each sheep using the recommended applicator.

DOSE RATE = 10 mL/10 kg LIVEWEIGHT

Liveweight (kg)	Dose Volume (mL)	Dose/Pack (6 L)	Dose/Pack (25 L)
10 - 15	2 x 7.5	400	1666
16 - 20	2 x 10	300	1250
21 - 30	2 x 15	200	833
31 - 40	2 x 20	150	625
41 - 50	2 x 25	120	500
51 - 60	2 x 30	100	416
61 - 70*	2 x 35	85	357

* Animals >70 kg = additional 10 mL/10 kg liveweight.

DO NOT USE on unshorn sheep or shorn sheep more than 24 hours after shearing.

DO NOT USE in ewes which are due to lamb within 6 weeks of treatment or in ewes with unshorn lambs at foot, as a reduction in lice efficacy is likely to occur.

COOPERS® MAVERICK®

LICE AND WORM CONTROL IN ONE DRUM

*It's like having
an extra pair
of hands*

Lice and Worm Control

Many progressive producers take a whole of farm approach to parasite control. Utilising programs that include quarantining of introduced sheep, fence maintenance, paddock rotation and a single shearing to name a few.

On many properties the ideal time to treat for both lice and worms is at shearing. Lice control products are most effective off shears, or in short wool, and while the whole flock is yarded it is a convenient time to drench.

While the timing is convenient, the process is not. For many years cattle producers have been able to control internal and external parasites with a single backliner, while sheep producers have still been using two different processes with two different products...

NOT Anymore!

extra pair of hands*

COOPERS® MAVERICK®

LICE AND WORM CONTROL IN ONE DRUM

- ✓ Lice and worm control
- ✓ Single off-shears pour-on application
- ✓ No double handling

Testimonials

Farmer: Steve Agars, Grazier
Location: Sheringa, South Australia (west coast)

We are very happy with the results Maverick has provided in terms of internal worm control. The drenching capabilities of Maverick means you get two for one, it works to kill lice effectively, and the worming side of it is a massive saving of time, which in turn saves money.

Our wool sells very well, and we have never been knocked down on price. At the last sale, we got Elders clip of the month!

Farmer: Kelly Dowling
Location: Dalton, New South Wales

We have found good success with Maverick as a worm knockdown at shearing and in keeping lice away year to year, and we definitely save labour costs by combining two management practises. Maverick provides a cheaper alternative and huge time management savings during shearing time.

Farmer: Jack Johnston, Grazier, Wyralla Grazing Company
Location: Dirranbandi, Queensland

We saw the instant results from the time we started with Maverick – I was more than pleased with the results. It worked, but also has the added benefit of saving labour time.

Instead of having two farmers in the yard at shearing time, you only need one – you've done two jobs with the one product.
